4-Inch 6-Cavity Duplexer

These Lamatel 4-inch 6-cavity base station duplexers are ideal for high power close frequency separation installations. These Band-Pass filters are designed for the combination of 2 frequencies that require extra isolation or they can be used as an efficient pre-selector. If higher levels of isolation are required, please consider using the 8 cavity configuration.

Selectivity can be determined by the field adjustable loops. Each cavity is temperature compensated for operation between -40°C to +60°C. Each cavity has a gold alodine finish, silver plated loops, and silver plated tuning rods.
